**Lack Of Unity**

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 23, 25-27, 29-34; 42-52 in part, drawn to a process for preparing **heterocyclic derivatives having an internal alkyne moiety**, classified in multiple classes and subclasses. Applicant is requested hereby to elect a single disclosed specie for search purposes. This group may be subjected to further restriction.

Group II, claims 23-, 25-38, 42-52, in part, drawn to a method to prepare **nonheterocyclic aromatic internal alkynes** derivatives as described in the said claims. Applicant election of a single disclosed specie is hereby requested. This group may be subjected to further restriction.

Group III, claims 23, 25-34, 42-52 in part, drawn to a process for preparing **derivatives wherein the moiety A in formula (I) is any residue of an organic compound and is not a heterocyclic or nonheterocyclic aromatic moiety**. Applicant is hereby requested to elect a single disclosed specie for search purposes. This group may be subjected to further restriction.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

- Each method uses different starting materials and is directed to the preparation of different products having different chemical structures and/or reactivities
- Each product obtained is classified in multiple classes and subclasses
- A given reference anticipating or suggesting any of the above inventions cannot be used to reject any of the other inventions under the meaning of 35 USC 102 or 35 USC 103. Thus each process is patentable distinct and independent of each other.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in

Art Unit: 1625

the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
